E5: decoherence-assisted search
Grid, single target
success probability
walk steps t
$p = 0$
$p = 0.1$
$p = 0.2$
$p = 0.5$
$p = 1$
Toy semantic graph, single target
success probability
walk steps t
Deadline success versus decoherence
success at $t = 20$
measurement probability p
grid_clustered
grid_single
toy_clustered
toy_single
Search time versus decoherence
time to half-maximum
2×10^1
10^1
measurement probability p
